

Chimelong Hengqin Bay Hotel

Zhuhai, China

Architectural 2,000+ LED Strobe-Brik system production
2013

Just south of Macau on China's southern coast, Hengqin Bay Hotel includes over 2,000 Birket SB-011QD LED strobes on its sparkling exterior. Nearly one hundred 1500mA LED Brik-32S and 660mA LED Brik-16S Strobe-Brik controllers are used. Custom Birket-designed and built strobe mounting sleeves provide a moisture barrier and easy maintenance access.

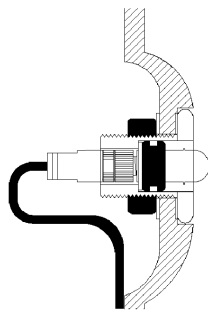

The marine themed hotel has recreation options including a wave pool, indoor water park, and dolphin lagoon. There is a botanical garden and flamingo lagoon surrounding the outdoor dining area. Chimelong Ocean Kingdom plans to house the world's tallest Observation Wheel and the world's longest wooden roller coaster.

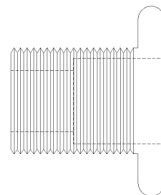

With over 1,800 guest rooms, Hengqin Bay Hotel will be the largest hotel in China. As a part of the Chimelong Ocean Kingdom, the hotel can be accessed by multiple types of transportation including boat and light-rail.
